

LEDUS Lighting and Jade Sky Technologies Sign Strategic Cooperation Agreement

LEDUS partners with Jade Sky Technologies to create cost-effective, easy-to-use LED lighting solutions

Milpitas, CA – April 22, 2014 – Jade Sky Technologies (“JST”), a clean-tech start-up manufacturer of LED driver ICs with best-in-class dimming at the best value, announces the signing of a Strategic Cooperation Agreement with LEDUS Lighting Technology Ltd. (“LEDUS”), a subsidiary of Tech Pro Technology Development Limited (“Tech Pro”) (Stock Code: 3823.HK). This cooperation allows LEDUS and JST to collaborate in the creation of a family of LEDUS branded high-quality LED products based on JST’s industry leading driver IC with deep dimming and ultra-wide dimmer compatibility. The goal is to make these high-quality LED products available globally in 2014.

“JST shares our goal of accelerating the mass consumer adoption of LED lighting by bringing to market high-quality LED lights that truly dim well” said Tech Pro Chairman, Mr. Amos Li. “While fully utilizing each party’s advantages and core competencies, we will work together to advance our industry by offering products focused on the best end user experience.”

“We are excited to cooperate with LEDUS and Tech Pro to create high-quality LED lights that delight users by working as expected in the ways of traditional lighting yet offering the tremendous energy savings and reliability associated with solid-state lighting. By focusing on what end consumers want in their lighting and offering them high-value products through forward-thinking manufacturers such as LEDUS, we put forth a means to achieve global energy savings,” says Jade Sky Technologies CEO, Mr. David Chen. “We already have the technology to make an awesome LED bulb. By partnering with LEDUS, that technology will be made commercially available, allowing for the global benefits we all deserve.”

About Jade Sky Technologies, Inc.

Jade Sky Technologies (<http://www.jadeskytech.com>) was founded in 2010 in Silicon Valley by a group of highly experienced power-IC and power-system designers. The founding mission was to bring simplicity back to lighting for the end consumer by making a true retrofit LED bulb possible. Holding many patents, JST manufactures LED driver chips with unsurpassed dimming performance at unsurpassed value. By focusing on a superior end-user experience, JST helps to enable the mass adoption of LED lighting.

About LEDUS Lighting Technology Limited

LEDUS (<http://www.ledus.com>) is a subsidiary of Tech Pro Technology Development Limited (“Tech Pro”) whose shares are listed on the main board of The Hong Kong Stock Exchange Company Limited (Stock Code: 03823). LEDUS, an international brand in LED products, provides innovative and high-performance solutions. LEDUS has its own LED accessories, assembly factories, copper and aluminum PCB manufacturing facilities, LED chip-on-board (COB) packaging, LED modules, and LED assembly.
